PREFACE

In view of the necessity of re-evaluating the technology transfer, the actual work of the Japanese Experience Project has been carried out through two methods — the formation of a consortium and the research work of the subject matter.

The tasks assigned to the consortium formation are as follows:

(a) review and reappraisal of existing studies;
(b) collection of information concerning on-going researches, researchers involved, and hypotheses and theories developed therein; and
(c) collection of information on experiences of other countries.

This bibliography is a result of the activities in the first field of the consortium formation. This is expected to articulate the subject area that the Japanese Experience Project is dealing with and also to serve the purpose of opening the avenues towards further research collaboration with the scholars of the various countries.

EDITOR'S NOTE

This bibliography lists books, articles in collective volumes, doctoral dissertations and articles in selected journals appeared in English during the period from 1945 to 1979 on the problems of socio-economic development of Japan from circa 1600 to 1940.

The actual work of compilation has been done in association with Mrs. Akiko Ishii.

As regards the books contained, the compilers depend mostly on:

In selection doctoral dissertations, the following pamphlets are used:

Journals cited are listed on pages iv-viii.

This bibliography is divided into several subject sections and subsections. Both sections and subsections are further divided into four parts: I. books, II. articles in collective volumes, III. doctoral dissertations, and IV. articles in selected journals.
In each part citations are listed alphabetically by author, giving the following information.

I. author, title, place of publication, publisher, year of publication, number of pages

II. contributor, title of article (editor, book's title, place of publication, publisher, year of publication, number of pages of article)

III. author, title, degree earned, date of degree, school name, number of text pages

IV. contributor, title of article, periodical's name (underlined), volume, number, date of publication, number of pages of article

The compilers are mainly concerned with the problems of socio-economic development. Therefore, the coverage is insufficient for politics and also the method of selection is rather discretionary. Suggestions and information would be welcome from all sources about important books and articles left out of this bibliography and new works which ought to be included in a planned revised edition.

Anyone who compiles a bibliography enters into many debts to friends and colleagues. The present compilers are especially grateful to the following libraries for permitting access to their facilities and collections:

The Library, Institute of Developing Economies, Tokyo.
The Library, The Institute of Economic Research, Hitotsubashi University, Tokyo.
The International House of Japan Library, Tokyo.

Finally we thank Mrs. Hatsuko Nakaba and Mrs. Kazuko Shinohara for their painstaking work of typing the manuscript in several forms.
